EXPERIENCE

Sensedia, Campinas, BR (Remote) *Frontend Developer – TypeScript*

APR 2022 - PRESENT

- Transforming legacy software into cutting-edge technological innovation.
- Mentored a technical writer, empowering them to evolve into an independent developer within the frontend team.
- Engineered and refined the UI Library in collaboration with the frontend team and UI/UX designers.
- Main tech: **TypeScript, JavaScript, Angular, React, Next.js, Micro Frontend, Jest, HTML, CSS, Nginx, Docker** and **AWS**.

Hora da Redação, Rio de Janeiro, BR (Remote) *Full Stack Engineer – Java – Freelance*

MAR 2022 - PRESENT

- Lead strategic meetings with stakeholders, crafting insightful documentation to analyze optimal product strategies.
- Architect, develop and comprehensively test end-to-end products, encompassing documentation, code, testing, and CI/CD deployments.
- Drive the creation of websites, platforms, and mobile applications (Android/iOS) alongside backend development.
- Main tech: **TypeScript, Java, Spring, Node.js, React, React Native, PostgreSQL, MongoDB, Docker** and **AWS**.

Valora, Rio de Janeiro, BR (Remote) *Frontend Engineer – TypeScript*

OCT 2020 - JUN 2022

- Pioneered the development of the platform and website from scratch, collaborating closely with the UI/UX design team.
- Led the frontend team, providing guidance and fostering a collaborative environment.

SKILLS

I have 6 years of experience with a wide range of tools including:

JavaScript, TypeScript, React, CSS, HTML, Java, Spring Boot, DevOps, Docker, Pipelines (CI/CD), Git, Linux and **AWS**.

I've applied these skills in different types of systems used by many companies.

HIGHLIGHTS

Developed a full application for web, mobile and backend inside Hora da Redação

Helped to reduction in 51% of infrastructure costs inside Hora da Redação

Developed a complete Email platform inside E-Target

Developed from scratch an open-source UI Library inside Valora.

EDUCATION

Centro Universitário UniCarioca — Bachelors in Computer Science

JAN 2020 - JUN 2023

- Created an open-source UI Library, widely embraced and published on NPM.

- Main tech: TypeScript, JavaScript, Next.js, React, Jest, Cypress, Python, Django, Docker, Nginx and AWS.

LANGUAGES

Portuguese and English

E-Target, Rio de Janeiro, BR *Full Stack Engineer - TypeScript*

FEB 2020 - JAN 2021

- Incepted numerous applications from the ground up, ranging from platforms to websites, showcasing Full Stack prowess.

- Engineered a comprehensive email system, encompassing message sending and receiving through POP3, IMAP, and SMTP protocols.

- Conducted meetings with stakeholders, including clients, CEO, and CTO, for analysis and documentation purposes.

- Ensured continual enhancement of software through comprehensive expertise and adept problem-solving.

- Main tech: TypeScript, JavaScript, PHP, Symfony, Node.js, React.js, Docker, Nginx and AWS.

SCIOSYS, São Paulo, BR (Remote) *Full Stack Engineer - TypeScript - Freelance*

SEP 2020 - NOV 2021

- Developed a platform, website, and mobile app.

- Conducted stakeholder meetings and performed comprehensive testing.

- Main tech: TypeScript, JavaScript, Node.js, React, React Native, MongoDB, PostgreSQL, Docker, Nginx and Linode.

Interpreta Brasil, Rio de Janeiro, BR *Full Stack Engineer - Java - Freelance*

JAN 2020 - OCT 2020

- Built a study platform with package purchases and CMS.

- Implemented video streaming capabilities.

- Main tech: Java, Spring, TypeScript, JavaScript, React, PostgreSQL, Docker, Nginx and AWS.

Pontifical Catholic University of Rio de Janeiro, BR *Full Stack Developer - JavaScript - Volunteer*

MAR 2017 - DEC 2022

- Developed a website and a study support platform (online library).

- Integrated CMS into the website, library, and other small applications.

- Acted as a computer science teacher.

- Main tech: JavaScript, jQuery, PHP, HTML, CSS, React and MySQL.
